SELECT-A-FIT:

Exclusively from Excelsior Lighting, our Xset feature allows you to set your own fixture location within our Models IN4 and IN5 well lights. This feature helps provide the proper fixture location for your lamp beam spread. Spot lamps can be located deeper into the fixture while wide floods can be located closer to the fixture grate. Our simple design offers three grooved locations on the outside of the fixture cap, one inch apart. Simply decide which setting is best for your application and snap the fixture into place!
